

DANA 10mm

STABILITY

Canyons rope semi-static type

EN - 1891:1998

Semi-elastic rope especially recommended for intensive use in canyoning by large groups. This highly manageable rope is ideal for professional guides.

Dana 10 canyoning has been manufactured in high visibility colours which make it easy to find, even under water, and constructed in such a way to provide a better resistance in fast or long descents without producing burning.

It includes the STABILITY finishing, exclusive of KORDA'S, which has been the pioneer in getting the union of sheath and core, to prevent slippage of the sheath and the unpleasant sock effect.

Diameter	9,9mm
Weight per metre	63,1g/m
Core percentage	58%
Sheath percentage	42%
Sheath slippage	0%
Elongation	3,6%
Static resistance	2730daN
